HIGHLIGHTS

WELCOME

Promotional items that your heart desires – individual, promising, and brand new!

It's time for new items! Our new catalogue for promotional items 2021 is on the spot with innovative highlights, remarkable novelties, and trendy products. This edition is a complementary addition to our PROMOTIONTOPS catalogue, which continues to be valid. Be inspired.

Of course our promotional items have a generous printing area, so that your advertising messages are the ultimate eye-catchers. To make sure that your campaign reaches every target, we arrange the ideal placement on the product together with you. There are different kinds of finishing techniques and we are happy to advise you.

Let yourself be carried away by our catalogue 2021!

SERVICE, QUALITY & SAFETY

Tested and certified

Promotional items are subject to strict European regulations. All products shown in this catalogue have been put through their paces. Consistent controls and constant improvements form the basis of product safety and guarantee the best possible quality. Certificates recognised all over Europe (RoHS, EN 71, etc.) will put your mind at ease. The DEKRA seal stands for security that you can trust. Feel free to ask us about desired certificates.

SUCCESSFUL BRANDING

SILKSCREEN PRINT

A screen is made impermeable in areas not to be printed through a photochemical process. The item is placed under the screen and printed on the areas where the screen is permeable. The colour is pushed through the holes and applied to the product. This method is ideal for flat surfaces, such as textiles or segments of umbrellas.

TAMPON PRINT

A template of the logo is made and filled with the desired colour of ink. Then the colour is transferred directly onto the article with a silicone pad. As this pad is made of flexible silicone, almost all surfaces can be printed – including uneven surfaces.

LASER ENGRAVING

A method using a laser beam to engrave a logo into nearly any material. A computer-controlled process ensures a pinpoint reproduction. The final result always depends on the material surface. A colour replica is not possible.

EMBROIDERY

A digitally controlled process in which a computer steers a needle and thread to embroider a surface. As many as 10 colours can be used in one embroidery procedure. The logo must be provided in advance in order to determine the number of stitches and perform an accurate cost calculation.

360° ENGRAVING

Engraving 2.0: the 360° engraving offers limitless possibilities. Thanks to a rotating device, the advertising message can be engraved circumferentially around the product in 360°. It will be an all-around eyecatcher! This method is particularly suitable for round, cylindrical, or conical products like travel mugs.

TRANSFER PRINT

A heat press, consisting of a heating plate and a base plate, is used to apply the logo/ picture/ text, pre-printed on thermal paper, onto the item. Beforehand, the thermal paper was imprinted through silkscreen or direct print.

LEAVE AN IMPRESSION.

Your logo or slogan sends a message and individualises your advertising medium. There are many ways to advertise your name. Below each product description you can see what type of finishing and which size is best for your advertising medium.

PRINT INFO:

Branding:

40 x 10 mm

K1+H2 (4)

printing technique
and printing size

printing code
(max. printing colours)

The prices shown for printing are prices for a one colour imprint on one position in our recommended printing technique and size. Set-up costs have to be added. The indicated prices are approximate and depend on the quantity ordered. For additional and bigger print options, please do not hesitate to contact us.

DOMING

The doming sticker is made of synthetic resin and a sticker with the company logo. The clear resin is fitted precisely to the logo print, protects the print and gives the logo a 3D effect. The convex sticker is perfect for advertising on rough or hard materials, such as umbrella handles.

DIGITAL TRANSFER

Digital transfer works in two steps. First, a special thermal paper is imprinted digitally (see passage „direct print“) and cut to size. In a second step, the logo / picture / text is then printed onto the product under pressure in a heat press.

DIRECT PRINT

With direct print, single drops of ink are fired through nozzles directly onto the item or paper (similar to an inkjet printer). Normally, colours that dry with UV light are used for high brilliance. Suitable for low quantity and flat items.

WE CARE

THE BEST IDEAS

We aim to have all-around satisfied customers! That is why we attach great importance to service, quality, and safety. The performance-oriented interaction between these three components creates trust. In this sense, nothing is impossible for us in order to satisfy you. – You may also contact us for direct imports.

Our PROMOTIONTOPS range keeps its validity, except for possible price changes, print errors, or changes of technical specifications.
