# SOCIAL RESPONSIBILITY

## SUSTAINABILITY IN THE PROMOTIONAL PRODUCTS INDUSTRY

003

Sustainability is an increasingly important term. Like any other industry, the promotional products industry must undergo an environmentally-conscious transformation as early as possible to meet the challenges of today and tomorrow and lead by example.

Investing resources in a responsible management is not only important but inevitable. Here, it is vital to view the challenges holistically and to always keep a 360-degree view on necessary measures serving sustainability.

The topics are many and they are versatile. Environmentalism, climate protection, human rights, ethics, sustainable consignment – the list is justifiably long and should take on an important place in everyone's day-to-day work. And although every step is an important one, it is above all collective efforts that lead to the so important success. This is exactly why it is essential for everyone to join forces and recognise the great opportunities of these crucial changes. In the promotional products industry, sustainable materials as well as all-encompassing environmentally-conscious and fair practices must manage to set new trends that take a firm place in the world of promotional products and not only accompany the industry in the short term but above all shape it significantly. We actively take on this responsibility.

## SERVICE, QUALITY & SAFETY 005

### MADE IN EUROPE

In order to reduce our carbon footprint, we rely on products MADE IN EUROPE.

This way, we save on transportation, resources, and, most important, CO2 emissions.

### TESTED AND CERTIFIED

Promotional items are subject to strict European regulations. All products shown in this catalogue have been put through their paces. Consistent controls and constant improvements form the basis of product safety and guarantee the best possible quality. Certificates recognised all over Europe (RoHS, EN 71, etc.) will put your mind at ease. The DEKRA seal stands for security that you can trust. Feel free to ask us about desired certificates.

## REFLECTIVE TRANSFER

Reflective transfer is a type of thermal transfer in which a design (e.g. a logo) is printed on a special reflective foil and then ironed onto a material (for example, on umbrella, cap, or backpack). The reflective effect 'transfers' to any Pantone colour.

# PRINTING SERVICE

006 SERVICE, QUALITY & SAFETY

## SILKSCREEN PRINT/ TEXTILE PRINTING

For silkscreen print, a screen is made impermeable in areas not to be printed through a photochemical process. The promotional item is placed under the screen and printed on the areas where the screen is permeable. The colour is pushed through the holes and applied to the product. When using coloured logos, it is recommended to add a white base coat to ensure brilliant colours. This method is ideal for flat surfaces, such as textiles or segments of umbrellas.

## TAMPON PRINT

A template of the logo is made and filled with the desired colour of ink. Then the colour is transferred directly onto the article with a silicone pad. As this pad is made of flexible silicone, almost all surfaces can be printed – including uneven surfaces.

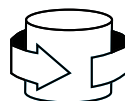

## LASER ENGRAVING

A method using a laser beam to engrave a logo into nearly any material. A computer-controlled process ensures a pinpoint reproduction. The final result always depends on the material surface. A colour replica is not possible.

### EMBROIDERY

A digitally controlled process in which a computer steers a needle and thread to embroider a surface. As many as 10 colours can be used in one embroidery procedure. This robust form of refinement can be used on all textiles. The logo must be provided in order to determine the number of stitches and perform an accurate cost calculation.

### 360° ENGRAVING

Engraving 2.0: the 360° engraving offers limitless possibilities. Thanks to a rotating device the advertising message can be engraved in a radius of 360° on the product. It will be an all-around eyecatcher! This method is particularly suitable for round, cylindrical, or conical products like travel mugs.

### TRANSFER PRINT

A heat press, consisting of a heating plate and base plate, is used to apply the logo / picture / text, pre-printed on thermal paper, onto the item. Beforehand, the thermal paper was imprinted through silkscreen or direct print.

## LEAVE AN IMPRESSION.

Your logo or slogan sends a message and individualises your advertising medium. There are many ways to advertise your name. Below each product description you can see what type of finishing and which size is best for your advertising medium.

and printing size

K1+H2 (4)  
print code  
(max. colours)

The prices shown for printing are prices for a one colour imprint on one position (incl. handling) in our recommended printing technique and size. Set-up costs have to be added. The indicated prices are approximate and depend on the quantity ordered. For additional and bigger print options, please do not hesitate to contact us.

### DOMING

The doming sticker is made of synthetic resin and a sticker with the company logo. The clear resin is fitted precisely to the logo print, protects the print, and gives the logo a 3D effect. The convex sticker is perfect for advertising on rough or hard materials, such as an umbrella handle.

### DIGITAL TRANSFER

Digital transfer works in two steps. First, a special thermo paper is imprinted digitally (see passage „direct print“) and cut to size. In a second step, the logo / picture / text is then printed onto the product under pressure in a heat press.

### DIRECT PRINT

Using digital print, you receive long lasting, vibrant colours. Items of many different materials and sizes can be branded individually. The big advantage: Apart from the handling charges, the printing cost merely depends on the size of your logo, independent of the number of colours.
